Making the Planet a Better Place

ECO-SHIM

Our **Mission** at American Molding Technologies is to do business that **benefits the consumer and the environment equally.**

We **pledge** to be an **earth-friendly** business leader. We solely **manufacture** products made exclusively from **100%** post-consumer **recycled** materials. Even our packaging supplies and cartons meet this **environmental** standard. As **supporters** of the U.S. economy, we are **proud** that all of our products, materials and packaging supplies are **made in the U.S.A.**

American Molding Technologies Inc.

**2350 E Lunt Ave.
Elk Grove Village, IL.
60007
Ph: 847.437.6900**

ECO-SHIMS are good for the planet:

- Made from 100% reclaimed plastic, wood and natural fibers
- 100% Post-Consumer recycled products
- Earth-friendly and environmentally safe

ECO-SHIMS are cost-effective and environmentally friendly because there is no waste involved during the manufacturing processes. No waste equals greater savings for the consumer and less landfill for the environment.

ECO-SHIMS are ideal for the following purposes:

- Leveling doors, windows, tile, and cabinets
- Eliminate rocking of toilets, appliance or bookcases on uneven floors;
- Stirring paint; Spreading adhesives;
- Straightening deck posts while installing drywall
